

TBG 96/N

the mobile animal stunning device for epidemic outbreak/emergency killing

The killing of pigs by farmers on the farm may be carried out as part of an emergency killing drill, whenever there is obviously no other means of alleviating great pain or suffering of the animals resulting from injury or illness.

The TBG 96N complies with the current VDE regulations (German association of electricians) and was designed in accordance with leaflet No. 84 "Killing larger groups of animals in the event of an epidemic outbreak" by the Veterinary Association for Animal Welfare (tierärztliche Vereinigung für Tierschutz e.V.).

Technical Data

Dimensions

400 x 225 x 300 mm

Weight

approx. 12 kg

Protection class

II

Mains connection

230 V 50 Hz

Output current

max. 2.3 A

Output voltage

250 V- 380 V

Equipment:

- Display of voltage/current
- Special transformer 2.3 A
- Visual and audible signal of minimum stunning time reached
- Selector switch with 3 programmes for different currents:
 - 1 = 2,3 A / 1.3 A current monitoring
 - 2 = 1,8 A / 1.3 A current monitoring
 - 3 = 1,3 A / 150 V for piglets
- Stainless steel stunning tongs with coiled cable, special handles and copper electrodes with centre spike for secure contact
- Rapid current increase in the 1st second to 2.3 A max
- Stainless steel wall mount for transformer and tongs
